

AI-MAS Winter Olympics: Crafting Quest 3

Team nbozidarevic Report

1 Interpreting Results

Section 1 presents a general overview of the results and your team's position on the board. The score in Table 1 is computed by the following rules:

- Each win is worth 2 points. A game is won by the team obtaining the highest score.
- Each draw is worth 1 point. A game is considered a draw if both teams obtain the same score.
- Each lost game is worth 0 points, the losing team being the one obtaining the lowest score.

The testing round featured one-on-one matches, all played on the same map (`map_cq3_v1.cqm`), the one that is currently included in the Crafting Quest 3 SDK. Additional maps will be created for the next testing rounds and qualifications. Section 2 shows you the general placement of your team (number many wins, draws and losses). Section 3 gives you the detailed results of each match outcome.
